The default is Requisition Query, which you can use to determine status on a requisition.

- NSN Inquiry is probably the most used category and will be focused on it this briefing.
- NSN Upload Capability gives you an opportunity to upload a text file of NSN items. You can uploaded up to 200 NSNs at a time.
- We have already covered Requisition Inquiry.
- There is also an opportunity to upload a requisition text file for status.
- Supply Assist Requests (SAR) can be input on-line.
- CRM Lookup provides a table of the team assigned to support your DoDAAC. If you go into this page and put your DoDAAC in (example: FB2029), you will be provided the phone number and email of the Customer Team supporting your requirements.

-SPRs by Ship to DoDAAC show the SPRs that

Stock Out Report (SOR)

- Only reflects BSM items – Source of Supply (SOS) of SMS
- The purpose of the Stock Out report is to proactively identify supportability issues before they actually occur
- The data is available to all authorized Customers with the exception of the DoDAAC query, which is restricted to data for Customers that are participating in Demand Data Exchange/Customer Collaboration

Stock Out Report (SOR)

- Users have the option to have the data results emailed to them, may download the results to Excel or displayed on the screen
- The report returns information on NIINs that currently are stock out or that are projected to have a stock out within the next 12 months
- The report is based on total DLA projected stock on hand and total requirements at the NIIN Level
- NIINs that do not have a current or projected stock out do not appear in the report

Stock Out Report (SOR)

- Projected stock out and get well dates are based on best available information at the time of the report
- If a Stock Out item only has a due in receipt that is delinquent, the Projected Get Well date will reflect the earliest scheduled receipt date (DLA Supply Planners receive notification to work these delinquent receipts first)
- The report only considers NIINs that are classified as stocked, AAC D and Z,
- Non stocked items are not included in this report

The NIINs are color coded as described below

- Red** – Item Stock Out date
- Yellow** – Item Potential Stock Out
- Blue**
- Orange** – AAC Z with demand
- Green** – AAC Z with no demand

Legend:	Item Stock-Out Date	Item Potential Stock-Out	Item Projected Get Well	AAC Z Item	AAC Z no demand
---------	---------------------	--------------------------	-------------------------	------------	-----------------

NOTE:

AAC Z items (color coded blue and orange) will not have a Projected Get Well Date. The Get Well Date is determined by comparing projected assets to projected demand. AAC Z items are resupplied based on MIN/MAX levels and not a statistical forecast. Therefore the system can not project a get well date for these non-forecastable NIINs.

AAC D items which only have a due in receipt that happens to be delinquent will reflect the Projected Get Well date of the earliest scheduled receipt. The Projected Get Well Date is determined by comparing projected assets to projected demand.
